

Screen plates

Hardox Screen plates for longer service life

Steel grade

Hardox 450 / 500

Thickness

Mostly 4–20 mm

Used in

Recycling and forestry. The screen plates (normally bended screen plates) are located on the bottom part of shredders and granulators and they are screening the cut waste and sometimes also cutting it.

Hardox advantages

- Substantial higher toughness! It means less risk of cracks during bending and also during operation.
- Even material properties give precise shape of the sieve.
- Less repairs and breakdowns.
- Longer service life.
